

**X-TubeProcessor®**

**automating routine tasks in the laboratory**

Laboratory personnel are confronted with new challenges every day. Monotonous recurring tasks, such as the manual processing of thousands of tubes, are

- tiring
- demoralizing
- stressful
- decrease productivity
- introduce errors.

The innovative **X-TubeProcessor®** provides a cost-effective solution, even for small labs. The modular all-in-one system automates tube processes and handles up to 5,000 screw-cap tubes per day:

This flexible system optimises laboratory workflow and adapts to customer needs. The **X-TubeProcessor®** was developed in close cooperation with customers and is constantly being updated and expanded with new modules.

**HTI bio-X specializes in laboratory automation.**

Along with the **X-TubeProcessor®**, our product portfolio includes various individual devices and integrated solutions for numerous laboratory tasks.

# X-TubeProcessor®

## flexible automatic processor for a range of laboratory tasks

### X-TubeProcessor® adapts for everyday laboratory activities

The functional equipment system optimises throughput in the lab and boosts productivity. The basic device is extremely versatile: thanks to its modular structure, it can be tailored to a wide variety of laboratory conditions and configured to suit individual needs.

In addition the conventional tasks of

#### Opening & Closing,

the X-TubeProcessor® can be extended with the following functions:

#### Sort

Tubes are supplied to the tube feeder as bulk items and sorted into racks.

#### Fill

Dispensing and pipetting modules fill the tubes quickly and precisely.

#### Label

Labeller modules print labels and apply them to the tubes.

#### Scan

Readers capture the tube barcodes.

#### Transfer

The finished tubes are placed in racks, in final packaging or into an output store.

### X-TubeProcessor® boosts efficiency in the lab

- Effectively supports laboratory work.
- Works quickly and reliably.
- Relieves staff of monotonous routine tasks.
- Easy touchscreen operation.
- Compact, space-saving system.

### X-TubeProcessor® features

- Automatically opens or closes 96 tubes in just 10 minutes.
- Processes up to 5,000 tubes per day.
- Supports various rack formats, tube sizes and lid types.
- Stand-alone system or integrated into a lab automation solution.
- Sensor-based process monitoring.

#### Feed

### X-Cap-Feeder\_M

- Accessory module for screw cap feeding
- Cap supply in a container
- Automatic feed to capper

#### Sort

### X-Tube-Feeder\_M

- Accessory module for bulk tube feeding
- Tube supply from a container
- Automatic tube separation and feeding to capping module

#### Fill

### X-Dispense\_M

- Accessory module for tube filling
- Tubes filled in parallel
- Reagents from 5 µl to approximately 50 ml per tube
- Powders from 1 to 100 mg per tube

#### Fill

### X-Fill\_M

- Accessory module for individual tube filling
- For small reagent volumes from 5 to 100 µl per tube

# X-TubeProcessor®

## innovative modular system

### X-Capper base device

Individually configurable  
and extensible **Open**  
**Close**

### X-Label\_M

- Accessory module for printing and labelling
- Applies labels to tubes
- User-defined label designs

#### Label

### X-Read\_M

- Accessory module for scanning tubes and / or racks
- Scans 1D or 2D codes

#### Scan

### X-Twin-Rack-Feeder\_M

- Accessory module for feeding two racks to the capper
- Racks are placed on a turntable and returned to the turntable on output

#### Transfer

### X-Rack-Feeder\_M

- Feeder for processing several tube racks in the capper

#### Transfer
